

PROUDLY PRINTED IN THE USA

Artwork Specifications

Accepted File Formats:

Files should be prepared using Adobe Illustrator, InDesign, or Photoshop. For Photoshop files, please provide layered files. Color should be set up in CMYK according to the final product. PMS or Spot colors should be converted to Process colors Before being sent.

It would be ideal for us to receive your native file format instead of converted files. Supplied resolution should be a minimum of 300dpi and a maximum of 450dpi. File formats we accept are:

 PSD (Photoshop)  INDD (InDesign)  AI (Illustrator)

 PDF  SVG  EPS  JPG

Conversion:

Please be aware that all RGB files that are received will be converted to CMYK for printing. Many bright colors that you see on your screen will not print the same on a sheet.

Completeness:

Please ensure that all files are complete by including all fonts, linked art, and high resolution graphics along with your final artwork file.

File Transfer:

Files transfers should be made through emailing zipped files to info@mrplayingcard.com.

Proof Approval:

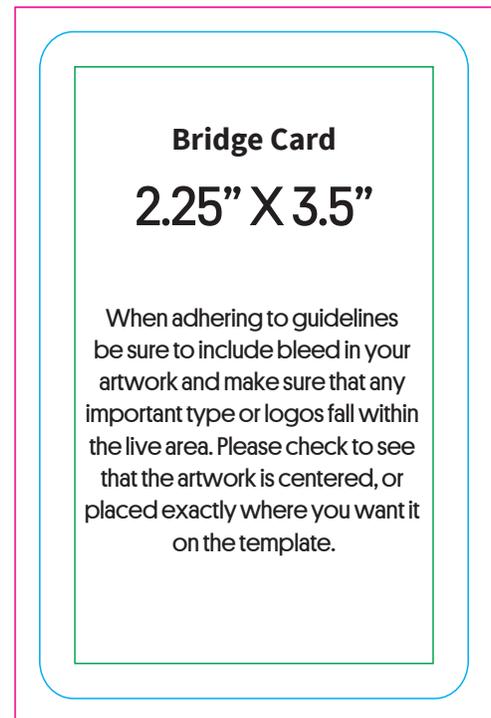

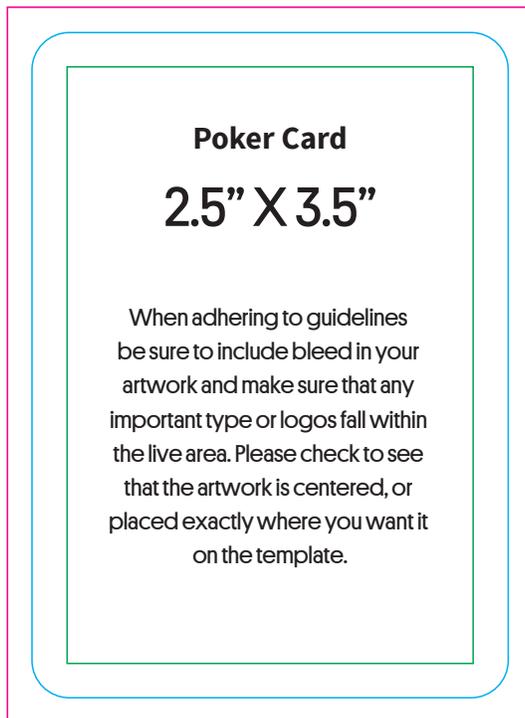

We will provide a digital proof that represents the final product of your art for you to review and approve.

Packaging:

Decks are shrink-wrapped in cellophane and are packaged in generic tuckboxes unless otherwise specified. Custom tuckboxes are available for an additional fee.

Delivery:

FOB: Orlando, Florida.
